Negative Emissions Technologies and Reliable Sequestration National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Ocean Studies Board, Board on Chemical Sciences and Technology, Board on Earth Sciences and Resources, Board on Agriculture and Natural Resources, Board on Energy and Environmental Systems, Board on Atmospheric Sciences and Climate, Committee on Developing a Research Agenda for Carbon Dioxide Removal and Reliable Sequestration, 2019-04-08 To achieve goals for climate and economic growth, negative emissions technologies (NETs) that remove and sequester carbon dioxide from the air will need to play a significant role in mitigating climate change. Unlike carbon capture and storage technologies that remove carbon dioxide emissions directly from large point sources such as coal power plants, NETs remove carbon dioxide directly from the atmosphere or enhance natural carbon sinks. Storing the carbon dioxide from NETs has the same impact on the atmosphere and climate as simultaneously preventing an equal amount of carbon dioxide from being emitted. Recent analyses found that deploying NETs may be less expensive and less disruptive than reducing some emissions, such as a substantial portion of agricultural and land-use emissions and some transportation emissions. In 2015, the National Academies published *Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration*, which described and initially assessed NETs and sequestration technologies. This report acknowledged the relative paucity of research on NETs and recommended development of a research agenda that covers all aspects of NETs from fundamental science to full-scale deployment. To address this need, *Negative Emissions Technologies and Reliable Sequestration: A Research Agenda* assesses the benefits, risks, and sustainable scale potential for NETs and sequestration. This report also defines the essential components of a research and development program, including its estimated costs and potential impact.

Phyllis Galembo Phyllis Galembo, 2019-04-25 A showcase of Phyllis Galembo's extraordinary photographs of the costume, ritual and traditions of masquerade Mexico Phyllis Galembo has travelled all over the globe to sites of ritual masquerade. In Africa, the Caribbean, and now Mexico, she captures cultural performances with a subterranean political edge. Using a direct, unaffected portrait style, Galembo captures her subjects informally posed but often strikingly attired in

traditional or ritualistic dress. Attuned to a moment's collision of past, present and future, Galembo finds the timeless elegance and dignity of her subjects. Masking is a complex, mysterious, and profound tradition in which the participants transcend the physical world and enter the spiritual realm. In her vibrant images, Galembo exposes an ornate code of political, artistic, theatrical, social and religious symbolism and commentary. Galembo highlights the creativity of the individuals morphing into a fantastical representation of themselves, having cobbled together materials gathered from the immediate environment to idealize their vision of mythical figures. While still pronounced in their personal identity, the subject's intentions are rooted in the larger dynamics of religious, political and cultural affiliation. Establishing these connections is a hallmark of Galembo's work.

The Geology of Somalia R. Lee Hadden, Topographic Engineering Center, U. S. Army Corps of Engineers, 2011-01-01 This bibliography on the geographical, water and geological information of Somalia was begun to fill a request for current information on that war-torn state. This bibliography brings together selected citations from a variety of different cartographic, geographical, geological and hydrological resources and a number of specialized library collections. Most of the citations have location information on where these items can be located and either used onsite, or borrowed through inter-library loan, or where copies of the items can be purchased from the originating source, or through commercial document delivery services.

Handbook on Marine Environment Protection Markus Salomon, Till Markus, 2018-01-31 This handbook is the first of its kind to provide a clear, accessible, and comprehensive introduction to the most important scientific and management topics in marine environmental protection. Leading experts discuss the latest perspectives and best practices in the field with a particular focus on the functioning of marine ecosystems, natural processes, and anthropogenic pressures. The book familiarizes readers with the intricacies and challenges of managing coasts and oceans more sustainably, and guides them through the maze of concepts and strategies, laws and policies, and the various actors that define our ability to manage marine activities. Providing valuable thematic insights into marine management to inspire thoughtful application and further study, it is essential reading for marine environmental scientists, policy-makers, lawyers, practitioners and anyone interested in the field.

The amphibians and reptiles of Luzon Island, Philippines, VIII: the herpetofauna of Cagayan and Isabela Provinces, northern Sierra Madre Mountain Range Rafe M. Brown, Cameron D. Siler, Carl H. Oliveros, Luke J. Welton, Ashley Rock, John Swab, Merlijn Van Weerd, Jonah van Beijnen, Edgar Jose, Dominic Rodriguez, Edmund Jose, Arvin C. Diesmos, 2013-02-07 Long celebrated for its more than 7,100 islands, the Philippines is a country in Southeast Asia that shares only with Madagascar the distinction of having been designated as both a Megadiverse Nation and a Global Biodiversity Conservation Hotspot. The terrestrial vertebrate fauna of the northeastern Philippines, specifically Luzon Island,

has been the subject of intense interest since the first historical explorations. Historically, numerous works considered the biodiversity of Luzon as 'depauperate' in the sense that they were presumed to contain a reduced number of species shared with a continental mainland source. This view has persisted until recently, when a renewed interest in faunistic studies of the northern Philippines has produced a series of notable discoveries, drawing attention to high levels of species diversity and endemism in the northern reaches of the archipelago. We provide the first report on the herpetological biodiversity (amphibians and reptiles) of the northern Sierra Madre Mountain Range, northeast Luzon Island, Philippines. We combine new and historical data, and the results of recent fieldwork, to highlight at least 101 species present in this unique region of the archipelago. Not only is this fauna largely endemic (approximately 70%), but also our results add to a nascent body of literature suggesting that the northern portions of the archipelago may be substantially more diverse than currently appreciated.

Water Resources of Pakistan Muhammad Arif Watto, Michael Mitchell, Safdar Bashir, 2021-03-25 This book presents the first comprehensive assessment of water resources in Pakistan including surface water resources and groundwater resources. It gives a detailed overview of issues and challenges related to water which have not been adequately addressed e.g. water resource vulnerability to climate change, groundwater depletion and contamination, and water governance etc. It includes a collection and compilation of unpublished and scattered data from the archives and repositories of various national institutions and organizations. Given the literature dearth, this book will not only be a comprehensive assessment of water resources in Pakistan but can also serve as an outstanding textbook on water resource management in Pakistan. It will attract a great range of readership including water specialists, researchers, undergraduate and post graduate students and policy makers from Pakistan as well as from overseas.

Sustainable Phosphorus Management Roland W. Scholz, Amit H. Roy, Fridolin S. Brand, Deborah T. Hellums, Andrea E. Ulrich, 2014-03-12 This book describes a pathway for sustainable phosphorus management via the Global Transdisciplinary Processes for Sustainable Phosphorus Management project (Global TraPs). Global TraPs is a multi-stakeholder forum in which scientists from a variety of disciplines join with key actors in practice to jointly identify critical questions and to articulate what new knowledge, technologies and policy processes are needed to ensure that future phosphorus use is sustainable, improves food security and environmental quality and provides benefits for the poor. The book offers insight into economic scarcity and identifies options to improve efficiency and reduce environmental impacts of anthropogenic phosphorus flows at all stages of the supply and use chain.

My Organic Life Nora Pouillon, Laura Fraser, 2015-04-21 A wonderfully engaging memoir from the woman who founded America's first certified organic restaurant, My Organic Life is the story of an unheralded culinary pioneer who made it her mission to bring delicious, wholesome foods to the American table. While growing up on a farm in the Austrian Alps and later

in Vienna, Nora Pouillon was surrounded by fresh and delicious foods. So when she and her French husband moved to Washington, D.C., in the 1960s, she was horrified to discover a culinary culture dominated by hormone-bloated meat and unseasonal vegetables. The distance between good, healthy produce and what even the top restaurants were serving was vast, and Nora was determined to bridge that gap. First as a cooking teacher, then as a restaurant owner, and eventually as the country's premier organic restaurateur, she charted a path that forever changed our relationship with what we eat. Since it opened in 1979, her eponymous restaurant has been a hot spot for reporters, celebrities, and politicians—from Jimmy Carter to the Obamas—alike. Along the way, Nora redefined what food could be, forging close relationships with local producers and launching initiatives to take the organic movement mainstream. As much the story of America's postwar culinary history as it is a memoir, *My Organic Life* encompasses the birth of the farm-to-table movement, the proliferation of greenmarkets across the country, and the evolution of the chef into social advocate. Spanning the last forty years of our relationship with food, *My Organic Life* is the deeply personal, powerfully felt story of the organic revolution—by the unlikely heroine at its forefront.

Biobased Nanotechnology for Green Applications Hemen Sarma, Sanket J. Joshi, Ram Prasad, Josef Jampilek, 2021-05-02 Investigation on biobased nanomaterials has provided new insights into the rapidly advancing fields of the biomedical and environmental sciences by showing how these nanomaterials are effective in biomedicine and environmental remediation. These particles hold tremendous prospective applications, and are likely to become the next generation of particles in these areas. As such, research is ongoing and the data generated should have the potential for a sustainable future in both the environmental and biomedical fields. This book presents important findings on the role of and identification of novel applications of biobased nanomaterials. Unlike other books in this field, this book focuses entirely on sustainable application and remediation in biomedicine and environmental science. The chapters are written in such a way as to make them accessible to the reader, and furthermore, the volume can be readily adopted as a reference, or used as a guide for further research. This project was based on recent research (the last 5 years) and developed through an extensive literature search. The editors have also compiled some advanced, outstanding texts that should be of benefit to graduate students in their research.

Advanced Pharmacological Uses of Medicinal Plants and Natural Products Singh, Ajeet, Singh, Padam, Bithel, Navneet, 2020-02-21 A vast majority of the world's population lacks access to essential medicines and the provision of safe healthcare services. Medicinal plants and herbal medicines can be applied for pharmacognosy, or the discovery of new drugs, or as an aid for plant physiology studies. In recent years, there has been increased interest in the search for new chemical entities and the expression of resistance of many drugs available in the market has led to a shift in paradigm towards medicinal research. Herbal treatments, the most popular form of folk medicine, may become an important way of increasing access to healthcare services. *Advanced Pharmacological Uses of Medicinal Plants and Natural Products* provides emerging

research exploring the theoretical and practical aspects of drug discovery from natural sources that allow for the effective treatment of human health problems without any side effects, toxicity, or drug resistance. Featuring coverage on a broad range of topics such as ethnobotany, therapeutic applications, and bioactive compounds, this book is ideally designed for pharmacologists, scientists, ethnobotanists, botanists, health researchers, professors, industry professionals, and health students in fields that include pharmaceutical drug development and discovery.

Biological Invasions in South Africa Brian W. van Wilgen, John Measey, David M. Richardson, John R. Wilson, Tsungai A. Zengeya, 2020-03-10 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

Sustainable Agriculture Reviews 34 Mu. Naushad, Eric Lichtfouse, 2019-04-17 This book is the result of remarkable contribution from the experts of interdisciplinary fields of Science with comprehensive, in-depth and up-to-date research and reviews. It describes the applications of date palm for food, medicine and the environmental sectors. Date palm is one of the oldest cultivated trees and its fruit has been a dietary staple around the world for many centuries. Date pulps contain dietary fibers and easily digestible sugars (70%), mainly glucose, sucrose and fructose. They also contain vitamins like biotin, thiamine, riboflavin, ascorbic and folic acid that are important for our body. The date palm fruit has been used in folk remedies for the treatment of various infectious diseases, cancer and immuno-modulatory activity. Date stones and date palm leaves are freely and abundantly available biomass. Therefore, the renovation of agricultural biomass wastes into activated carbons for drinking water purification, wastewater treatment, treatment of dyes, and metal-ions from aqueous solution would add value to agricultural commodities which offer a solution to environmental problems as well as reduce the cost of waste disposal.
