Beans, Bullets, and Black Oil Worrall Reed Carter, 1953

The Circle Dave Eggers, 2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman’s ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Undrowned Alexis Pauline Gumbs, 2020-11-17 Undrowned is a book-length meditation for social movements and our whole species based on the subversive and transformative guidance of marine mammals. Our aquatic cousins are queer, fierce, protective of each other, complex, shaped by conflict, and struggling to survive the extractive and militarized conditions our species has imposed on the ocean. Gumbs employs a brilliant mix of poetic sensibility and naturalist observation to show what they might teach us, producing not a specific agenda but an unfolding space for wondering and questioning. From the relationship between the endangered North Atlantic Right Whale and Gumbs’s Shinnecock and enslaved ancestors to the ways echolocation changes our understandings of “vision” and visionary action, this is a masterful use of metaphor and natural models in the service of social justice.

Night Photography and Light Painting Lance Keimig, 2015-05-15 Lance Keimig, one of the premier experts on night photography, has put together a comprehensive reference that will show you ways to capture images you never thought

possible. This new edition of Night Photography presents the practical techniques of shooting at night alongside theory and history, illustrated with clear, concise examples, and charts and stunning images. The Hunter Julia Leigh, 2022-06-20 The hunter arrives in an isolated community in the Tasmanian wilderness with a single purpose in mind: to find the last thylacine, the tiger of fable, fear and legend. The man is in the employ of the mysterious 'Company', but his sinister purpose is never revealed and as his relationship with a grieving mother and her two children becomes more ambiguous, the hunt becomes his own. Leigh's Tasmania is a place where the wilderness can still claim lives; where the connection between people and the land is at best uneasy and cannot be trusted. In prose of exceptional clarity and elegance, Julia Leigh creates an unforgettable picture of a man obsessed by an almost mythical animal in a damp dangerous landscape. The Hunter is the work of a compelling storyteller and a truly remarkable literary stylist.

The Kingdom of Infinite Number Bryan Bunch, Bryan H. Bunch, 2001-09-15 A guide to numbers, suggesting ways of looking at individual numbers and their unique properties.

Pentagon 9/11 Alfred Goldberg, 2007-09-05 The most comprehensive account to date of the 9/11 attack on the Pentagon and aftermath, this volume includes unprecedented details on the impact on the Pentagon building and personnel and the scope of the rescue, recovery, and caregiving effort. It features 32 pages of photographs and more than a dozen diagrams and illustrations not previously available.

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little

understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Musical Sound, Instruments, and Equipment Panos Photinos, 2017-12-20 Musical Sound, Instruments, and Equipment' offers a basic understanding of sound, musical instruments and music equipment, geared towards a general audience and non-science majors. The book begins with an introduction of the fundamental properties of sound waves, and the perception of the characteristics of sound. The relation between intensity and loudness, and the relation between frequency and pitch are discussed. The basics of propagation of sound waves, and the interaction of sound waves with objects and structures of various sizes are introduced. Standing waves, harmonics and resonance are explained in simple terms, using graphics that provide a visual understanding.

Galileo Unbound David D. Nolte, 2018-07-12 Galileo Unbound traces the journey that brought us from Galileo's law of free fall to today's geneticists measuring evolutionary drift, entangled quantum particles moving among many worlds, and our lives as trajectories traversing a health space with thousands of dimensions. Remarkably, common themes persist that predict the evolution of species as readily as the orbits of planets or the collapse of stars into black holes. This book tells the history of spaces of expanding dimension and increasing abstraction and how they continue today to give new insight into the physics of complex systems. Galileo published the first modern law of motion, the Law of Fall, that was ideal and simple, laying the foundation upon which Newton built the first theory of dynamics. Early in the twentieth century, geometry became the cause of motion rather than the result when Einstein envisioned the fabric of space-time warped by mass and energy, forcing light rays to bend past the Sun. Possibly more radical was Feynman's dilemma of quantum particles taking all paths at once — setting the stage for the modern fields of quantum field theory and quantum computing. Yet as concepts of motion have evolved, one thing has remained constant, the need to track ever more complex changes and to capture their essence, to find patterns in the chaos as we try to predict and control our world.

The Most Dangerous Game Richard Connell, 2023-02-23 Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However, they're not after animals – they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with The Hunger Games, starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 – 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel The Most Dangerous Game and for receiving an Oscar nomination for the screenplay Meet John Doe.

Maybe... Chris Haughton, 2021-11-30 A trio of misbehaving, mango-loving monkeys have a close call as the creator of Don't Worry, Little Crab gives readers a taste of vicarious mischief. Three little monkeys and their big monkey are sitting

high on a branch in the forest canopy. "OK, monkeys! I'm off, says the big monkey. "Remember . . . Whatever you do, do NOT go down to the mango tree. There are tigers down there." Mmm . . . mangoes! think the little monkeys. They LOVE mangoes. Hmm . . . Maybe . . . maybe they could just look at the mangoes. That would be OK, right? With vivid colors, bold shapes, and his trademark visual humor, Chris Haughton is back with a deliciously suspenseful cautionary tale about pushing boundaries—and indulging your more impish side (when nobody is looking).

Goodnight Everyone Chris Haughton, 2021-07-06 From the creator of Shh! We Have a Plan comes a mesmerizing bedtime tale of a forest settling into slumber and one little bear trying to stay awake. The sun is setting, and everyone in the forest is getting sleepy. The mice, rabbits, and deer all give great big yawns as they snuggle up with their families for the night. But someone isn't sleepy just yet. Little Bear thinks he can stay awake a bit longer. Can he do it? Chris Haughton's bold and vibrant illustrations will captivate little ones eager to stay up just a teeny bit longer, while sweet depictions of animals cozying up in their beds for the night will soon have them yawning off to a dreamland of their own.

This Present Moment Mary Savig, Nora Atkinson, Anya Montiel, 2022-06-21 A highly illustrated, important volume inspired by the way craft artists have united during the COVID pandemic and engaged in artistic conversations about race, gender, and inclusivity. During the summer of 2020, the space outside the Renwick Gallery--the Smithsonian American Art Museum's dedicated museum for contemporary craft and decorative arts--became home to a new discussion about racial justice on Black Lives Matter Plaza. The curators at the Renwick Gallery felt the need to align themselves with what was going on right outside the Gallery's door, the organizing rationale for understanding the objects presented in this volume, many of which are new acquisitions. The title is taken from Alicia Eggert's 2019-2020 eponymous neon work, and the 85 objects in the main plates section lead the reader from the idea of shelter, through layers of expanding spaces to the vast expanses of the universe. The volume looks at contemporary American craft in the whirlwind of now revealing possibilities for contemporary makers to respond to a more empathetic future.

NgVLA Eric James Murphy, 2018

The Andromeda Galaxy Paul Hodge, 2013-03-09 The Andromeda Galaxy, or M31, is an attractive galaxy for astronomers. It is close to us, it is of about the size of our galaxy, it provides some intriguing observational puzzles because the galaxy is nearly edge-on, and many objects can be studied in detail, because they are still sufficiently bright. With the current developments in instrumentation with which increasingly detailed studies of the Andromeda Galaxy can be made, this book provides a solid foundation for the start of new observations. This book is a mine of information about M31. It can be used as a reference by insiders, and at the same time it provides easy access for newcomers to the field.

Photographing National Parks Chris Nicholson, 2015 From sea to shining sea, the national parks preserve some of the country's most unique wilderness areas. As such, they are a gift to nature photographers everywhere. In the pages of

Photographing National Parks, Chris Nicholson delves into what all the parks offer to the photographer, and how to best research and prepare for a trip to explore the artistic opportunities within. Learn how to travel safely and photograph in the various environments found in the park system, including desert, alpine, forest and coastline. Discover where to find valuable information about iconic and secret photo locations, how to stay powered up in the outdoors, and ideas for ancillary gear that will make a photo project more efficient and productive.

Don't Worry, Little Crab Chris Haughton, 2020-04-07 From the award-winning creator of Shh! We Have a Plan comes a vibrantly colorful story about mustering the courage to try something new. Little Crab and Very Big Crab live in a tiny rock pool near the sea. Today they're going for a dip in the big ocean. "This is going to be so great," says Little Crab, splash-splashing and squelch-squelching along, all the way to the very edge. Then comes a first glance down at the waves. WHOOSH! Maybe it's better if they don't go in? With vivid colors, bold shapes, and his trademark visual humor, Chris Haughton shows that sometimes a gentle "don't worry, I'm here" can keep tentative little crabs sidestepping ahead — and help them discover the brilliant worlds that await when they take the plunge.

Stars Above, Earth Below Tyler Nordgren, 2011-01-28 Stars Above, Earth Below uses photographs and sky charts to form a connection between what is seen on the ground and in the sky, and looks at the deeper scientific meaning behind these sights. Nordgren describes other objects in the Solar System with features similar to those on Earth and links the geological features seen in the national parks to the very latest NASA spacecraft discoveries on other planets and their moons. Additionally, historical context is discussed to show why we humans (who have lived in and around our national parks for tens of thousands of years) have always been astronomers. The first book to make direct connections between astronomy and the landscapes, processes and cultures one experiences in the US National Parks Each chapter ties a specific astronomical phenomenon to a particular National Park or type of park and concludes with a "See for yourself" section that shows you how to see the planets, stars, nebulae, moons, etc. that are described within that chapter A personal guide showing the reader the astronomical phenomena that you can see for yourself when visiting the U.S. National Parks

Earth 2020: An Insider's Guide to a Rapidly Changing Planet Philippe Tortell, 2020-04-22 Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. Earth 2020: An Insider's Guide to a Rapidly Changing Planet responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human

environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. Earth 2020 is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.
